# Future City Vision

## Growing City Yao, creating and fostering connections to lead to a bright future with happiness

What is the Future City Vision?

The Future City Vision represents the ideal situation of Yao City, which is aimed to be achieved by promoting the Comprehensive Plan. With the aim of creating a city where all citizens involved in Yao City feel happiness and eventually bring happiness to the whole society and people in the future, the Yao City government strives to promote city building by showing the ideal situation of Yao City to actualize the Future City Vision together with its citizens.

### Six goals of city building

We, as city officials, will explain.

The following are what Yao City aims to become!

#### Goal 1

#### City where every citizen can realize growth toward the future

We aim to create a "city where every citizen can realize growth toward the future," which enables all citizens to feel the happiness of knowing that all children and young people grow in the warmth of people while receiving seamless support according to their individual situation, and adults around them also growing each other.

#### Goal 2

#### City that is prepared for an emergency

We aim to create a "city that is prepared for an emergency," in which all citizens can feel the happiness of being in a warm community where people support each other even in a crisis situation and feeling safe knowing that the city government provides support to all citizens in need by using various resources in case of an emergency.

#### Goal 3

#### City that publicizes its attraction to rest of the world

We aim to create a "city that publicizes its attraction to rest of the world," where all citizens can feel the happiness of being proud that attraction of Yao City, which citizens are involved in, becomes known widely, diverse talented people and companies are playing an active role, and the city is vibrant and receives attention.

#### Goal 4

#### Environmentally friendly city that is comfortable to live in

We aim to create an "environmentally friendly city that is comfortable to live in," where all citizens can feel the happiness of continuing to live in Yao City, which they want to live in and want to continue living in, and achieving a sense of fulfillment obtained from making eco-friendly efforts by themselves.

#### Goal 5

#### City where all citizens create and foster connections and value each other's individuality

We aim to create a "city where all citizens create and foster connections and value each other's individuality," which enables all citizens to feel the happiness of respecting each other's human rights, creating and fostering connections between people, displaying their individuality, and fulfilling their own potential.

#### Goal 6

#### Sustainable city created together by everyone's efforts

We aim to create a "sustainable city created together by everyone's efforts," where all citizens can feel the happiness of believing firmly that city building in Yao City is sustainable and Yao City is growing while government and people, including citizens from diverse backgrounds who have never taken part in city building, appropriately share responsibility in taking part in city building through exchange of opinions and cooperation.

# Purpose of the Formulation of the Comprehensive Plan and Perspectives for the Formulation

Why has the Comprehensive Plan been formulated?

The Comprehensive Plan provides basic guidelines for the ideal situation and direction of Yao City in the future and has been formulated to proceed with city building in a comprehensive and planned manner. The Yao City Sixth Comprehensive Plan aims to create a city where all citizens will feel happiness.

## Purpose of the formulation

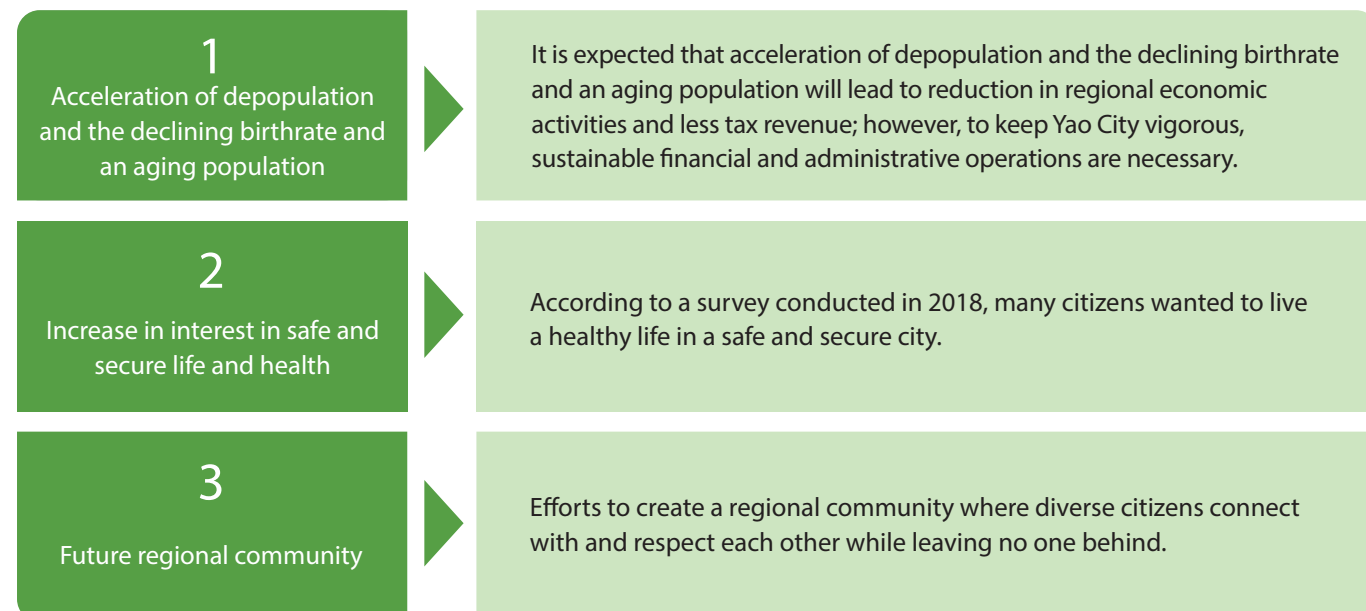

What perspectives were valued in formulating the Plan?

The following three perspectives were valued: (1) Acceleration of depopulation and the declining birthrate and an aging population, (2) increase in interest in safe and secure life and health, and (3) future regional community.

Measures in consideration of the tide of the times and voices of communities are necessary, aren't they?

## Perspectives for the formulation

# Composition and Promotion of the Comprehensive Plan

Tell me what the Comprehensive Plan is composed of.

The Comprehensive Plan is composed of the three layers of Basic Concept, Basic Plan and Action Plan. The 8-year Basic Concept provides the Future City Vision, etc., the 4-year Basic Plan provides a city building implementation policy, etc., and the Action Plan, which is revised every fiscal year, provides individual projects.

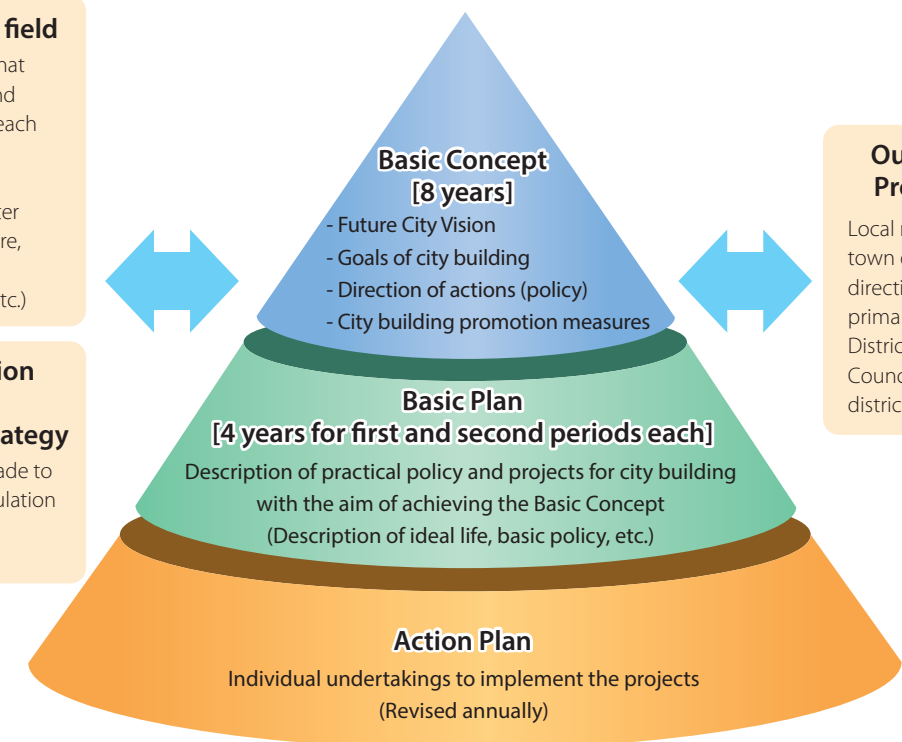

I see that the Comprehensive Plan is formulated with a long-term vision and specific projects are revised annually.

## Individual plan by field

Individual specific plan that provides the direction and operational structure in each field based on the Comprehensive Plan (Crime prevention, disaster prevention, health, welfare, education, environment, industry, infrastructure, etc.)

## Yao City Population Vision and Comprehensive Strategy

Efforts that should be made to put a stop to the depopulation and achieve regional revitalization

## Our Community Promotion Plan

Local residents' hope and town development directions put together primarily by the School District Town Development Council in each school district

How is the city building process advanced based on the Comprehensive Plan?

To achieve "Growing City Yao, creating and fostering connections to lead to a bright future with happiness," we will make efforts toward "building a city from a crosscutting perspective" and "co-creating a community for living together." Details are explained on the next page.

## Building a City from a Crosscutting Perspective

One of the ways of proceeding with the Sixth Comprehensive Plan is building a city from a crosscutting perspective.

## What is meant by a crosscutting perspective?

It means that collaboration among the projects and cooperation with a variety of entities are promoted since one project has more than one city building goal, rather than being aimed at achieving only one goal. The following table shows the structure of the projects.

Future City Vision

## Growing City Yao, creating and fostering connections to lead to a bright future with happiness

Goals of city building		1 Future & Growth	2 Preparations & Preparedness	3 World & Attraction	4 Life & Environment	5 Connections Individuality	6 Everyone's efforts Sustainability

	31 Promoting lifelong learning and sports	●			●	●	
	32 Trusted municipal administration			●	●		●
	33 Promoting public facility management		●		●		●
	34 Promoting administrative and financial reforms						●

## Co-Creating a Community for Living Together

To promote the Comprehensive Plan, co-creating a community for living together is essential.

## What is co-creating a community for living together?

It is the idea of community building that values activities that are carried out by combining all the regional forces of local residents, business and school commuters, companies, and the city government (co-creating) in order for all citizens to live together while leaving no one behind (living together).

## What steps are taken?

Citizens and the city government conduct projects for solving regional problems and creating attraction while sharing responsibility and cooperating with each other by using opportunities for dialog to take steps for sharing problems, creating ideas, carrying out activities and reviewing.

1

**We value opportunities for open dialog.**  
(Sharing common regional problems and creating ideas)

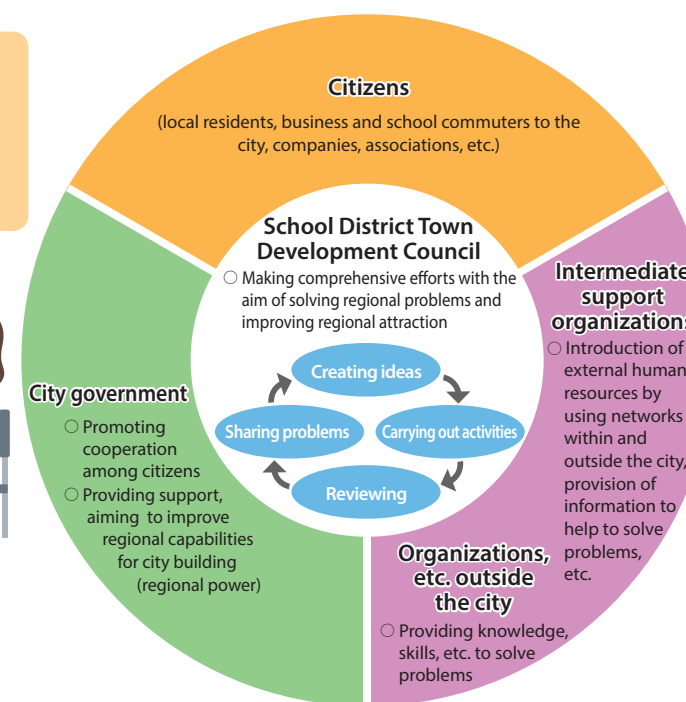

2

**Various different entities cooperate to solve problems.**  
(Creating ideas and carrying out activities)

3

**We verify effects of activities.**  
(Reviewing)

I see that all regional people have discussions, provide ideas and carry out activities to build a community!
